June 2013 - Present

[Itexico](#)

Front End Developer

My work includes the following:

- Meeting clients remotely.
- Setting up tasks and time management
- Develop a series of projects from Ajax powered widgets, dashboards, responsive email templates, parallax presentation-websites, gamification style web apps, among others.
- Effective communication with clients and project managers.
- Titanium Certified Developer

January 2013 - June 2013

[Freelancer](#)

Developer.

Moving back to Mexico I took on several freelancer jobs, producing content managed websites. I worked remotely with a graphic designer in Mexico City and a few other people, my job was to manage the projects and act as the main coder and UX designer.

Mid 2010 - Apr 2013

[Mustard Design Agency \(Previously JPMedia\), Battersea Business Center, London, UK](#)

Developer.

My work included the following:

- Meeting with the clients.
- Project Management (Time and tasks planning).
- Budgeting the production side of the project.
- UX design
- Sitemaping and producing barebones wireframes for the designer.
- Backend and frontend development.
- Delivering the project and providing technical support to the client.

The type of projects that we specialized in were: ecommerce sites implementing open source platforms with the LAMP stack and customizing it to fit the client's needs and user content managed websites.

05/2009 - 04/2011

[The Northcote, 2 Northcote Road \(Full Time\) London, UK](#)

Barman, duties include serving the customers, stocking the bar, handling money, waiting tables and cleaning the pub, responsible for designing the publicity boards.

01/2007 - 07/2009

Freelance graphic designer, specialising in web page design and corporate imaging. I created a logotypes, catalogues and designed product packages.

2002 - 2007

During this period, I gave private maths and physics lessons to young people (11 to 18 years old) with difficulties in school. I helped them to improve their grades and knowledge of these subjects.

2003 - 2005

[Leitmotiv, Graphic Design Studio.](#)

I worked there as a Web page designer, and I also contributed to a variety of projects such as corporate image, design of brochures, flyers and magazines. The most important project we managed was the image of the coastal area of the state of Jalisco, Mexico.

[Voluntary Work](#)

Over a six year period (2000 to 2006) I worked as a voluntary teacher in an evening school for adults with financial difficulties, which offered the students different technical courses to help them improve their skills.

The lectures I gave included: Basic Computer Science, Windows, CorelDraw (for graphic design students), Internet, Microsoft Word and PowerPoint, basic programming in C++, web site development and design with Dreamweaver.

[Certifications](#)

- 2013: Titanium Certified Developer
- 2006 3D Modelling course with Lightwave 3D at the Animation School in Guadalajara
