Employment in the UK

04/2011 - Present

[Mustard Design Agency \(Previously JPMedia\), Battersea Business Center, London](#)
Developer.

My work includes the following:

- Meeting with the clients.
- Project Managament (Time and tasks planning).
- Budgeting the production side of the project.
- Sitemaping and producing barebones wireframes for the designer.
- Backend and frontend development.
- Delivering the project and providing technical support to the client.

The type of projects that we specialize in are: ecommerce sites implementing the Prestashop open source platform and customizing it to fit the client's needs and dynamic websites using Wordpress (for blogs, portfolios or sites that require social networking capabilities).

05/2009 - 04/2011

[The Northcote, 2 Northcote Road \(Full Time\)](#)

Barman, duties include serving the customers, stocking the bar, handling money, waiting tables and cleaning the pub, responsible for designing the publicity boards.

08/2007 - 04/2009

[The Hansom Cab pub, 84 – 86 Earls Court Road, Kensington. \(Part Time\)](#)

Barman, duties included serving the customers, stocking the bar, handling money, waiting tables and cleaning the pub.

Employment in Mexico

01/2007 - 07/2007

Freelance graphic designer, specialising in web page design and corporate imaging. One client included Procesa (a company which rebuilds electrical auto parts). I created a new logo, a catalogue and designed boxes for their products.

2003 - 2004

Leitmotiv, Graphic Design Studio.

I worked there as a Web page designer, and I also contributed to a variety of projects such as corporate image, design of brochures, flyers and magazines. The most important project we managed was the image of the coastal area of the state of Jalisco, Mexico.

2002 - 2007

During this period, I gave private maths and physics lessons to young people (11 to 18 years old) with difficulties in school. I helped them to improve their grades and knowledge of these subjects.

Voluntary Work

Over a six year period (2000 to 2006) I worked as a voluntary teacher in an evening school for adults with financial difficulties, which offered the students different technical courses to help them improve their skills.

The lectures I gave included: Basic Computer Science, Windows, CorelDraw (for graphic design students), Internet, Microsoft Word and PowerPoint, basic programming in C++, web site development and design with Dreamweaver.
